Benefits in Detail

Death Benefit

In case of an unfortunate demise of the Life Insured during the Policy Term, the Policy will pay Death Benefit which is equal to higher of Sum Assured or Fund Value subject to a minimum of 105% of Total premiums paid till date of death, where Sum Assured is defined as a multiple of the Annualized Premium.

Premium Paying Term	Sum Assured Multiplier		
	Age at entry < 45 Years	Age at entry >= 45 Years to < 50 years	Age>=50 years
5	7/10	7	5
10,15 or 20	7/10	7/10	5/10

For example, a person aged 40, paying a premium of ₹1 lac annually, for a premium payment term of 10 years can choose a Sum Assured Multiplier of 7 or 10 of his/her Annualized Premium. That is, his/her Sum Assured can be ₹7 Lacs (7*100000) or ₹10 Lacs (10*100000) depending on the Sum Assured Multiplier opted by him/her.

Maturity Benefit

On survival of the Life Insured till maturity date and subject to Policy being in force for full risk benefits, the Policy will pay the fund value to the Policyholder. Death cover and the rider risk cover chosen will cease on Maturity.

Surrender

The Policy will acquire surrender value from the first Policy year but it become payable only after completion of 5 complete Policy years. The surrender value will be the value of units less discontinuance (or surrender) charges.

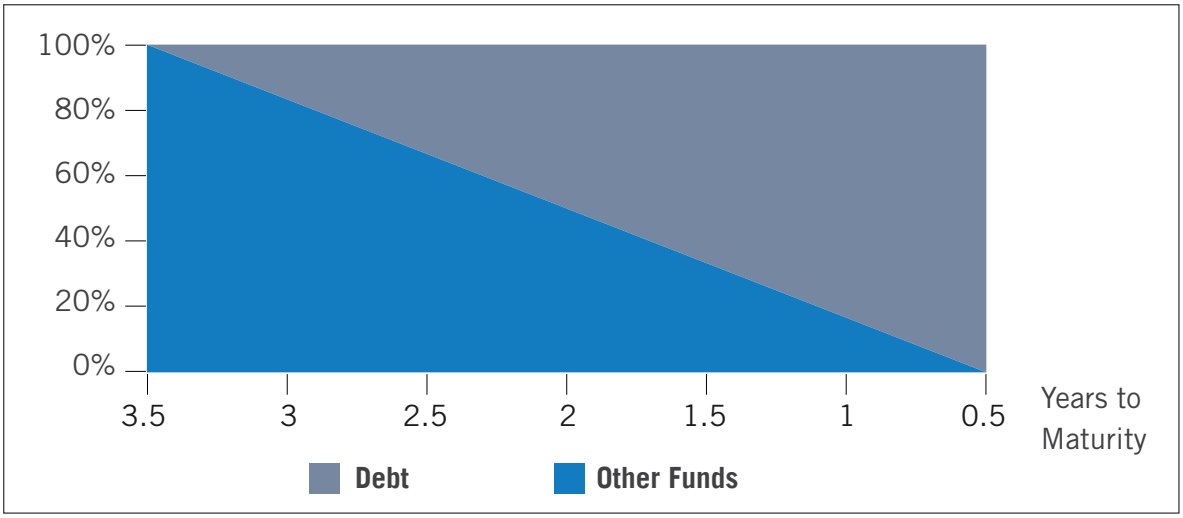

Fund Conservation Option

This is an option, to preserve your capital towards end of your Policy, when your investments are due to be paid back.

All your investments are systematically transferred from funds of your choice to Debt Fund in the last three years of your Policy; on a half-yearly basis. The exposure in your chosen funds is systematically diverted to Debt Fund at the beginning of every half-year. 1/N of the units from the funds of your choice at the beginning of each half year will be switched to the Debt Fund, where N is the number of half years before maturity.

Period before Maturity	N
6 half-years before maturity	6
5 half-years before maturity	5
4 half-years before maturity	4
3 half-years before maturity	3
2 half-years before maturity	2
1 half-years before maturity	1

We shall explain the above concept with the help of an illustration:

A customer enters at the age of 30 years and plans to stay invested for a period of 20 years, i.e. his Maturity age is 50 years. When he turns 47 years of age he enters into the last 3 years of the Policy. Here he is invested 100% in Balance Fund. This fund corpus is transferred in six half-yearly installments into Debt Fund and the allocation in Debt Fund becomes 100% six months before Maturity.

All Premiums received during this period will be re-directed to Debt Fund.
