Renewability Option at Maturity

At maturity, the policyholder can choose to extend the term of their respective benefit option. Policyholders can extend their benefit term by an additional five years, provided they meet the maximum maturity age and pay the required premiums as per the Board Approved Underwriting Policy (BAUP). The policy must be active with all due premiums paid up to date. Policyholders can choose a new term and premium payment period of five years, within the specified limits. Benefits will continue based on the outstanding coverage at the time of extension. For HospiCare benefits, applicable lifetime limits will be restored upon renewal of new tranche. For Multistage Criticare, Cancer Care, and Cardiac Care benefits, the outstanding coverage will be the lifetime limit minus any claims for minor conditions. Extension is not possible if 100% of claims have been settled. For Accidental Disability Care, the outstanding coverage will be the lifetime limit minus any settled claims. Extension is not possible if 100% of claims have been settled. Additional premiums will be calculated based on the life assured's age at the time of extension and the chosen policy term and premium payment period, reflecting the outstanding coverage at the extension date. No policy alterations, except for changes in policy term or premium payment term, are allowed at the time of extension. This ensures that policyholders can continue to enjoy their benefits with minimal disruption, provided they meet the necessary conditions.
