Plan Benefits In Detail

Death Benefit

In case of death of the life assured during the policy term, provided the policy is in force as on the date of death, the company will pay the claimant the sum of base death benefit and top-up death benefit (if any), (as applicable on the date of intimation of the death of the life assured):

The base death benefit is the highest of:

- Base Fund Value[1] or
- Base sum assured on death;

Where Base sum assured on death is the highest of Base Sum Assured[3] and 105% of the premiums paid (excluding top-up premium) up to the date of death.

Top-up death benefit is the highest of Top-Up Sum Assured[4] and Top-Up Fund Value[2].

[3] Base sum assured shall be reduced only to the extent of partial withdrawals with respect to the Base Fund Value during the[1] two-year period immediately preceding the death of the life assured.

[1] Base Fund Value means summation of number of units in each segregated fund multiplied by the respective unit price/ NAV. This includes Return of Allocation Charges, Return of Mortality Charges and Loyalty Additions, if applicable.

[2] Top-Up Fund Value is equal to the total units in respect of the Top-Up Premiums, if any, received under the policy multiplied by the respective unit Price/NAV as on valuation date.
[3] Base Sum Assured means the amount which is equal to the product of the sum assured multiple and the Annualized Premium ^. Sum Assured multiple is chosen at the time of purchase of the policy.
[4] Top-Up Sum Assured means the additional sum assured basis the Top-Up Premiums.
[$] Total Premiums Paid means total of all the premiums received under the base product including Top-up Premium[#] paid, if any.

In case the facility for premium reduction or reduction of sum assured multiple has been opted for, then the Base Sum Assured[3] would refer to the reduced sum assured post premium reduction or Sum Assured Multiple Reduction.

Maturity Benefit

On survival of life assured till the end of the policy term provided all the premiums are paid and the policy is in force, Total Fund Value[@] would be paid as a lumpsum amount. The policyholder will also have an option to receive the maturity benefit as a systematic payout for a maximum of five years under settlement option.
The policy shall terminate upon the payment of the maturity benefit.
[@]Total Fund Value = Base Fund Value[1] + Top-up Fund Value[2]
Base Fund Value will include the following benefits:

1.**Return of Mortality Charges**: We shall return mortality charges starting from 11th policy year, if all due premiums have been paid in full and the policy is in force. At the end of each month starting from 11th policy year, multiple of Mortality Charges (excluding underwriting extra charge) deducted from 1st policy month shall be added to the fund value in the form of addition of units. It shall be allocated to the fund in the same proportion of the fund value as available on the due date of Return of Mortality Charges. Return of Mortality Charges will exclude mortality charges deducted from the Top-Up Account.

For example: 1st policy month's mortality charge shall be added back in the 121st month, 2nd policy month's mortality charge shall be added back in the 122nd month, 3rd month's mortality charge shall be added back in 123rd month and so on until the end of the policy term.
The multiple of Mortality charges would vary depending upon the Policy Year:

Policy Year	Return of Mortality Charge
11 to 15 years	1X of mortality charges collected during 1st to 5th policy year shall be added back to the fund value

16 to 20 years	1.25X of mortality charges collected during 6th to 10th policy year shall be added back to the fund value
21 to 25 years	1.5X of mortality charges collected during 11st to 15th policy year shall be added back to the fund value
26 to 30 years	2X of mortality charges collected during 16th to 20th policy year shall be added back to the fund value
31 to 35 years	2.5X of mortality charges collected during 21st to 25th policy year shall be added back to the fund value
36 to 40 years	3X of mortality charges collected during 26th to 30th policy year shall be added back to the fund value

We shall return the mortality charge of last 10 years on maturity. The multiple applicable shall be based on the policy year band in which the last policy year falls in the above table.
For example: In case of maturity at the end of 25th year, the last 10 years (i.e. 16th to 25th policy year) mortality charge will be refunded at 1.5X.

2. **Return of Premium Allocation Charges (if applicable)**
An amount equal to total of premium allocation charges deducted during the policy term will be added back to the Base Fund value[1] at the end of the 10th policy year in the same proportion as the value of the total units held in each fund at the time of allocation provided all the due premiums have been received. Allocation charges pertaining to Top-up Premium will not be refunded.

3. **Loyalty Additions**

a. With this fund boosting feature, the policyholder will receive loyalty units which will be added from the end of the 7th policy year and thereafter at the end of each policy year as specified below, till maturity.
b. Loyalty units are expressed as a percentage of the average of preceding 36 months' fund value and will be added into the Base Fund Value[1] on the policy anniversary as specified in the table below.
c. This benefit is applicable only if all due premiums have been paid up to the date of each Loyalty Addition.
d. Loyalty Additions will not be applicable to any Top up Fund value. Amount of Loyalty Addition will be allocated in funds in the same proportion as of the Base Fund Value[1] as on the date of addition.
e. In order to compute the average fund value, we will consider the Base Fund Value[1] as on the date of month anniversary for each of the previous 36 months.

Loyalty additions percentages are provided below:

End of Policy Year	7th year	10th year	15th year	20th year	25th year	30th year	35th year	40th year

Lifestyle Portfolio Strategy

We understand that your investment need and objectives are dynamic and change as per your changing life stage. The Lifestyle Portfolio Strategy addresses the same by providing you with the right mix between Equity and Debt, based on the duration of your investment. This helps you automatically decrease your exposure to Equity and increase your exposure to Debt as your age increases and your policy nears maturity.

Under this strategy, depending on the duration of your policy, Premiums Paid subject to deduction of charges will be allocated between the 3 investment funds as per a pre-defined strategy as mentioned in the table below.

Years to Maturity	Allocation in various Funds		
	Secure Fund	Debt Fund	Blue Chip Equity Fund

9	0.00%	20.00%	80.00%
8	0.00%	30.00%	70.00%
7	0.00%	40.00%	60.00%
6	0.00%	50.00%	50.00%

5	0.00%	60.00%	40.00%
4	0.00%	70.00%	30.00%
3	10.00%	70.00%	20.00%
2	30.00%	60.00%	10.00%
1	40.00%	60.00%	0.00%

Years to Maturity = Policy Term - Policy Year + 1

- At the start of each policy year, the total fund value across all segregated funds will be reallocated between the Funds as per the proportion mentioned above.
- The Unit creation subject to applicable charges, will be as per the allocation percentage mentioned above.
- Upon reinstatement of a policy, the missed premiums will be allocated in different segregated funds in a proportion corresponding to the policy year of reinstatement.
- The Company may from time to time change the asset portfolio allocation in the existing segregated funds with prior approval from the IRDAI.

Target Asset Allocation Strategy

- Under this strategy, You can allocate your premiums between any two segregated funds available with this Policy, in the proportion of Your choice.
- Your portfolio will be rebalanced every quarter to ensure that this asset allocation is maintained. The re-balancing of units shall be done on the last day of each Policy quarter.
- If the last day of the quarter is a non-working day, then the next working day's NAV will be applicable. You can avail this option at inception or at any time later during the Policy Term.

Automatic Transfer Strategy

- Under this strategy, you may invest your premium in any of the available Debt-Oriented Funds (i.e., Debt Fund, Secure Fund, or Liquid Fund), and systematically transfer a fixed amount every month into any one of the Equity-Oriented Funds (i.e., Blue Chip Equity Fund, Opportunity Fund, Accelerator Fund, Flexi Cap Fund, or Mid Cap Fund).
- The total Annual Premium net of Premium Allocation Charges (if any) will be invested in the chosen Debt-Oriented Fund. The Units in the chosen Debt-Oriented Fund will then be systematically transferred in equal installments on a monthly basis to the selected Equity-Oriented Fund. All future Premiums will follow the same pattern, provided that this strategy remains active under the Policy.
- Switching between the two selected funds to any other available funds is not permitted under this strategy.
- This strategy shall not be available if you have opted for monthly premium payment frequency. It shall be available only until the end of the Premium Payment Term and shall not apply to any Top-Up Premium contributions.
- A portion of total units in the chosen debt-oriented fund shall be switched automatically into the chosen equity-oriented fund in the following way:
- Policy Month 1: 1/12 of the units available at the beginning of Policy Month 1
- Policy Month 2: 1/11 of the units available at the beginning of Policy Month 2
- Policy Month 6: 1/ 7 of the units available at the beginning of Policy Month 6
- ---
- Policy Month 11: ½ of the units available at the beginning of Policy Month 11

- You may opt for this strategy either at the inception of the policy or at any subsequent policy anniversary, provided you notify the Company at least 30 days in advance. You may also choose to switch out of this strategy at any Policy Anniversary by notifying the Company at least 30 days in advance.

Stabilized Gains portfolio strategy

- Under this option, the Premium, after deducting the Premium Allocation Charges, shall be allocated and invested in the Accelerator Fund. The Fund Value will be tracked on a daily basis to monitor any pre-determined upside movement of 10% or more relative to the net invested amount.
- If the Fund Value in the Accelerator Fund appreciates by 10% or more of the net invested amount, the amount corresponding to such appreciation shall be transferred from the Accelerator Fund to the Debt Fund at the prevailing unit price effective on the date the appreciation threshold is met.
- If the Fund Value in the Accelerator Fund does not achieve an appreciation of 10% or more relative to the net invested amount, the Fund Value shall remain fully invested in the Accelerator Fund, and no transfer to the Debt Fund shall be made.

The policyholder will have to specify the amount or percentage of the fund s/he wants to switch from one fund to another. There is no restriction on the number of switches policyholder can make and all switches will be free of charge but only policyholder can exercise this option. Any automatic switching under other than Self-Managed Portfolio Strategy will not be considered as switch.

Reduction In Sum Assured Multiple (SAM)

You have the option to reduce the sum assured multiple anytime during the policy term after the completion of the 1st policy year.

- Decrease in Sum Assured multiple will not change the premium payable under the policy.
- Once revised, the death benefit payable will be based on the revised Sum Assured multiple under the Policy. This will be referred to as the prevailing Sum Assured multiple.
- The Sum Assured multiple can be decreased provided all due premiums till date have been paid and the payment of premiums under the policy has not been discontinued.
- Mortality charges shall be revised accordingly.
- Once reduced, the SA multiple cannot be increased again.

Surrender

You have the option to surrender your policy at any time.

If the policy is surrendered during the Lock-in Period:

- The Total Fund Value[@] less the Discontinuance/ Surrender Charge (if any, as detailed below), will be transferred to the Discontinuance Policy Fund.
- Proceeds of the Discontinuance Policy Fund, will be payable to the policyholder as surrender value at the end of the lock-in period.
- In case of death of the life assured anytime within the lock-in period after the Total Fund Value[@] has been transferred to the Discontinuance Policy Fund, we will pay the value of the Discontinuance Policy Fund on the date of intimation of death of life assured to the Claimant.

If the policy is surrendered after the completion of the Lock-in Period:

- The Surrender Value payable to the policyholder will be Total Fund Value[@] as on the date of surrender.

The policy will terminate thereafter upon payment of the Surrender Value.

What If I Am Not Happy With The Plan After Buying It? (Free Look Period)

Free Look means a period of thirty (30) days from the date of receipt of the policy document whether received electronically or otherwise, to review the terms and conditions of the policy, where if you disagree with any of the terms and conditions or otherwise and have not made any claim, you have the option to return the policy stating the reasons for objection. Upon return, the policy will terminate forthwith and all rights, benefits and interests under the policy will cease immediately. You shall be entitled to an amount which will be equal to non-allocated premium plus charges levied by cancellation of units plus Total Fund Value[@] at the date of cancellation less mortality charge for the period of cover, rider charges, if applicable, expenses incurred on medical examination of the life assured, if any, and stamp duty.

What If I Missed My Premium Due Date? (Grace Period)

Grace period is a period of 15 days for monthly premium payment frequency and 30 days for all other frequencies, from the due date for payment of policy premium. The policy will be in-force during the grace period. During the grace period all charges under the policy will continue to apply.

In case of death of the life assured during the Grace period, full death benefit as applicable on date of intimation of death will be payable.

What Happens If I stop Paying The Due Premiums?

It is recommended that you pay all premiums for the period selected to be able to enjoy all policy benefits.

However, at any stage if you stop paying premiums and it remains unpaid at the expiry of the grace period, the treatment of the policy will depend on whether the premium is discontinued during lock-in period of the policy or after it.

Discontinuance Of Premium During Lock-In Period Of The Policy

- If the premium is not received before the expiry of the grace period, we will, within 3 (three) months of the first unpaid premium, communicate to you the status of the policy and provide the option to revive the policy within the revival period.
- On discontinuance of policy due to non-payment of premium we will, on the date of discontinuance, transfer the Total Fund Value[@] by creation of units into the Discontinuance Policy Fund after deducting applicable discontinuance/surrender charges. The risk cover and rider cover, if any, will terminate on the date of discontinuance. No further charges will be levied by us other than the fund management charge applicable on the Discontinuance Policy Fund.
- In case you opt to revive the policy but do not revive the policy during the revival period, we will close the unit account and pay the proceeds from the Discontinuance Policy Fund to you at the end of the revival period or lock-in period whichever is later.
- In case of revival period ending after lock-in period, the policy will remain in Discontinuance Policy Fund till the end of revival period without any risk cover.
- In case the policyholder does not exercise the option as set out above, the policy shall continue without any risk cover and rider cover, if any, and the policy fund shall remain invested in the discontinuance fund. At the end of the lock-in period, the proceeds of the Discontinuance Policy Fund shall be paid to the policyholder and the policy shall terminate.
- However, the policyholder has an option to surrender the policy anytime and proceeds of the Discontinuance Policy Fund shall be payable at the end of lock-in period or date of surrender whichever is later.

  Here, “Proceeds of Discontinuance Policy Fund” is the discontinuance fund value after addition of the entire income earned for the period of investment in the Discontinuance Policy Fund net of applicable fund management charges, subject to a minimum guarantee of the interest, at the rate prescribed by IRDAI from time to time.

  If the policy is in discontinuance status during the lock-in period, death benefit is the value of the Discontinuance Policy Fund as on date of intimation of death.

Discontinuance Of Premium After Lock-In Period Of The Policy

1. If the premium is not received before the expiry of the grace period, the policy will be converted into a reduced paid up policy with the paid-up sum assured i.e. (original sum assured) multiplied by a ratio of total period for which premiums have already been paid to the maximum period for which premiums were originally payable as per the terms and conditions of the policy. The policy shall continue to be in reduced paid-up status without rider cover (where rider premium is recovered in the form of charge), if any. All charges as per terms and conditions of the policy may be deducted during the revival period. However, the mortality charges shall be deducted based on the reduced paid up sum assured only.
2. On such discontinuance, we will within three(3) months of the first unpaid premium, communicate to you the status of the policy and provide the following options:
    a. To revive the policy within the revival period of three years, or

5. However, the policyholder has an option to surrender the during the revival period. Upon receipt of the request, we will pay the Total Fund Value[@] and terminate the policy.

Return of Allocation Charge (if any), Return of Mortality Charge and Loyalty Additions (if any) shall not be applicable if the policy is in reduced paid-up status. However, any additions made before the policy is converted to reduced paid-up status shall not be reversed.

The death benefit under a paid up policy will be as follows:

- Higher of: (Paid-up sum assured on death) or (Base Fund Value[1] as on date of intimation of death); Where paid-up sum assured on death is higher of paid-up sum assured[^^] or 105% of the Premiums paid (excluding Top-Up premium) up to the date of death.
- Plus top-up death benefit (if any).

[^^] Paid-up sum assured shall be reduced only to the extent of partial withdrawals with respect to the Base Fund Value during the two-year period immediately preceding the death of the life assured.

Maturity Benefit for a paid-up policy will be Total Fund Value[@] as on date of maturity.
The policy will terminate upon payment of death benefit or surrender benefit or maturity benefit.

How Do I Revive My Lapsed Policy?

Once the policyholder revives the policy, the policy shall be revived restoring the risk cover and the rider cover, (where rider premium is recovered in the form of charge), if any, along with the investments made in the segregated funds as chosen by the policyholder less the applicable charges as described below in accordance with the terms and conditions of the policy.

1. You can revive the lapsed or paid-up policy within 3 consecutive years from the due date of first unpaid premium and before the expiry of the policy term subject to the following conditions:
    a. Give us request on our website www.bandhanlife.com/ iAssist or via any other mode as may be acceptable to us to revive the policy or policy along with rider cover, if any; and
    b. Life assured produces evidence of insurability (in form of declaration of health condition and/or relevant medical reports specified by us) at your own cost, acceptable to us as per our

underwriting policy; and

c. You will pay us all overdue premiums.

2. The company, at the time of revival:
   a. Shall collect all due and unpaid premiums without charging any interest or fee.
   b. May levy policy administration charge and premium allocation charge as applicable during the discontinuance period. Guarantee charges, if applicable during the discontinuance period, may be deducted provided the guarantee continues to be applicable. No other charges shall be levied.
   c. Shall add back to the fund, the discontinuance charges deducted at the time of discontinuance of the policy if the policy was discontinued during the lock-in period.
   d. Will create units at the unit price as on the date of revival using the amount of premium paid on revival, less any premium allocation charges and Policy Administration Charges attributable to the premium paid on revival in accordance with the ratio in which the premium should be allocated in the funds specified by you.

Upon revival of a policy, all the benefits under the policy (along with the rider benefits, if any) will be restored and the policyholder will become eligible for all due return of mortality and premium allocation charges and loyalty additions, if applicable.
